Education

KL University, Vijayawada	2023 – 2027
B.Tech in Computer Science Engineering	CGPA: 9.37 / 10
Narayana Junior College	2021 – 2023
Intermediate (MPC)	Marks: 957 / 1000

Technical Skills

- Languages:** Python, C, JavaScript, Java
- Frameworks & Technologies:** React.js, Node.js, Express.js, Tailwind CSS, JWT
- Databases:** MySQL, MongoDB
- Concepts:** DSA, OOP, DBMS, Operating Systems

Experience

Frontend Developer Intern	2024 – 2025
PETZU	
- Collaborated within a 5–7 member startup team to develop responsive frontend interfaces for a production-grade pet marketplace platform using React.js and Tailwind CSS. - Built reusable UI components and improved accessibility, and user interaction workflows across multiple pages. - Implemented Framer Motion-based animations, hover effects, and page transitions to enhance overall user experience.	

Projects

Code Analyzer	JavaScript, Manifest V3, Gemini/OpenAI/Groq APIs
- Developed a browser extension for LeetCode and HackerRank that performs AI-assisted code review directly within coding platforms. - Engineered DOM-based workflows to analyze submitted solutions for code quality, optimal approaches, and complexity analysis. - Implemented dynamic AI provider configuration supporting Gemini, OpenAI, and Groq model integration.	
github.com/Chethanreddyc/Code_Analyzer	
STAY – Rental Platform	React.js, Node.js, MongoDB, JWT
- Built and deployed a full-stack MERN property rental platform supporting authentication, property listings, image uploads, and search functionality. - Implemented JWT-based role authorization and developed RESTful backend APIs for listing and user management. - Integrated Cloudinary for asynchronous image uploads and deployed services using Vercel and Render.	
stay-two.vercel.app	
AI-Powered Cyber Tool	Python, CustomTkinter, Gemini API
- Developed a desktop-based cybersecurity suite integrating AI-assisted threat analysis into a unified security utility. - Built modules for password entropy analysis, phishing email detection, credential security assessment, and automated report generation. - Integrated Google Gemini API to analyze suspicious emails for phishing indicators, sender spoofing, and malicious links.
